

## Manhattan Virtual Classroom

The Manhattan Virtual Classroom is the online learning environment for students from RBHS. It allows teachers to:

1. Provide students with handouts, notices, lecture materials, interactive self-tests, and websites to visit.
2. Assign homework for students to complete, receive the work they do in response to those assignments, and provide feedback.
3. Issue multiple-choice, True/False, and short answer exams.
4. Exchange messages with students.
5. Host discussions with the entire class, or with teams of students.
6. Publish Podcasts that your students can receive using iTunes or other Podcasting software.
7. Track which students are using the system and when.
